CarolinaLiving.com GUIDE requires advertisers and their agencies to supply ad materials in digital format only. Please see the below instructions for creating digital files.

Digital Ad Specifications

These specifications are designed to help create the highest quality image for your advertising message.

- **PDF Format:** Advertisers should submit PDF files that are prepared for press-optimized printing (300 dpi) in CMYK with fonts embedded.
- **Preferred Applications:** Ad layouts should be created using either QuarkXpress™; or Adobe InDesign®. If submitting application files, provide all supporting graphics and fonts.

- **Media:** FTP upload, CD or DVD. Ads under 10MB may be emailed. Contact Ann Dolin at adolin@carolinalive.com for FTP drop-off details.

- **Mechanicals:** Crop marks for non-bleed full-page ads should be indicated at printed page trim size (8.125 x 10.875).

Bleed ads should extend beyond trim crop marks by 1/8 inch on all sides. Fractional ads should be set up exactly to sizes as posted on this page. No crop marks on fractional ads.

- **Lettering:** Reproduce all reverse lettering with a minimum of colors. Type smaller than 8 point with fine serifs should be avoided. Be aware that small, reverse type and fine lines may not be reproduced exactly as intended when run on a full web press and thus should be avoided.

- **Photos:** 300 dpi, actual size; CMYK color model; .tif or .eps format; no JPEG compression.

- **Line Art/Text:** 600 dpi minimum; CMYK color model; .eps or .tif format with color preview. In Photoshop, black text should be created in black channel only to avoid registration problems.

- **Color Tone Values:** To avoid over-saturation of ink, the total combined value of CMYK colors should not exceed 300% (i.e. C=100, M=100, Y=50, K=50). Any one color with a required value over 85% should be made solid.

- **Color Mode:** Ads should be converted to CMYK prior to submission as color shifts may occur. Ads received in RGB color will be converted to CMYK.

- **Fonts:** When submitting application files, include screen and printer fonts. On illustrations, it is recommended to convert text to outline, however outline text cannot be altered.
